

Educational Provider Agency

WHO ARE WE?

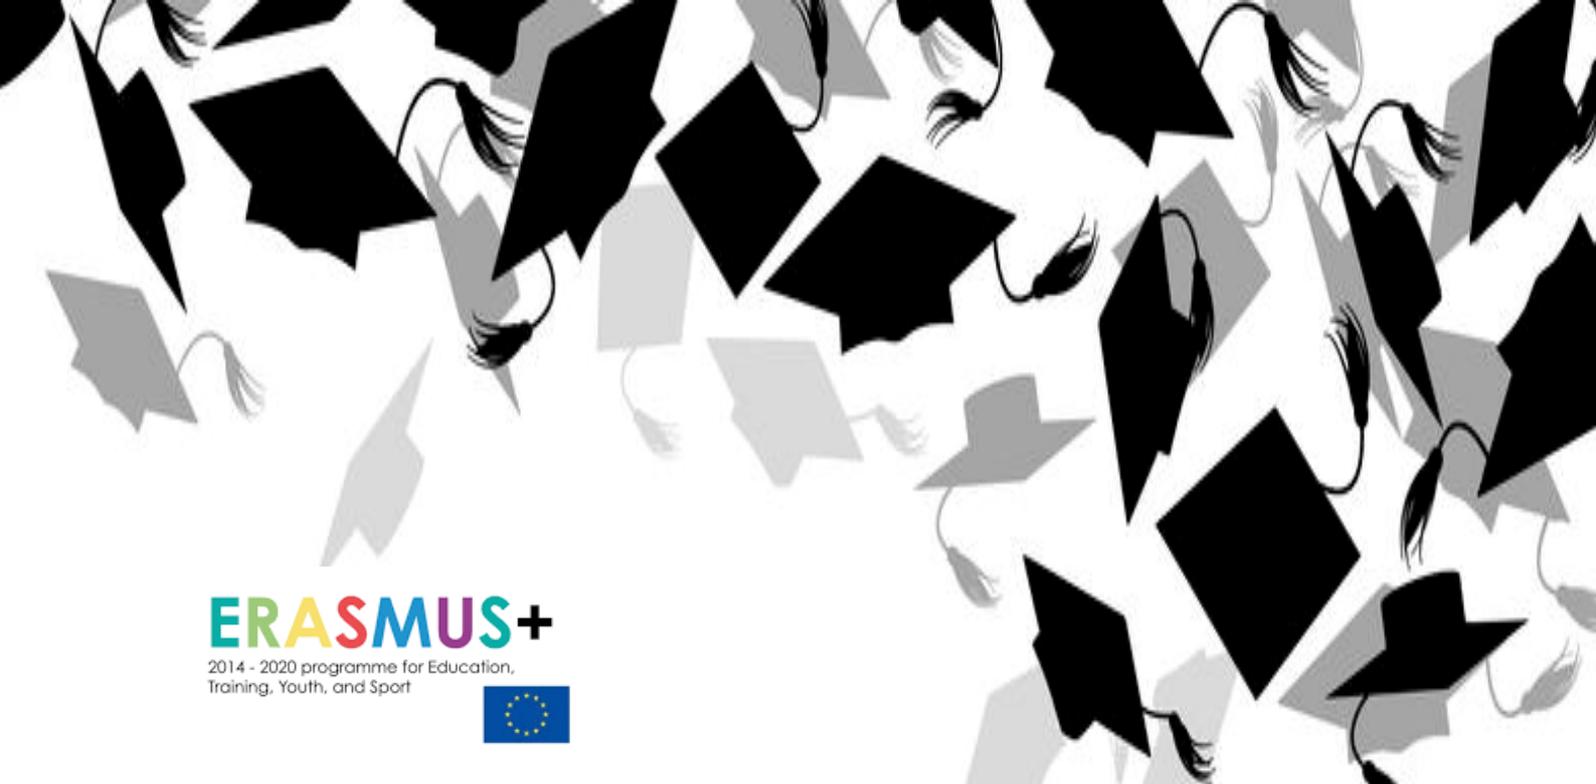

Educational Provider Agency “EPA”, is an european private company specialised in knowledge sharing, support and management of international educational projects.

Based on our broad expertise, **EPA** has a long and extensive background in advanced learning technologies, including support, development, educational analysis and management roles.

EPA produces and disseminates its proper knowledge, refined methods and stimulates practical application of research results on education and training of human resources, providing valuable resources and “state-of-art” training contents. EPA works in a range of important public and private stakeholders from universities and academic institutions to R&D institutes, international and state agencies, school systems, and NGOs.

EPA engages corporations, foundations, national agencies and designing projects just to maximize philanthropic investments and save significantly costs with greatest success. Every year EPA involves more than 30,000 students in educational campaign and projects with its own national network of distinguished professionals with strong and diverse expertise in specific disciplines including education, psychology, statistics, sociology, economic and social development, anthropology and political science.

EPA is a member of important educational and professional networks and is able to co-operate over European, Mediterranean, African, Arabian, Latin American and Asian countries.

ERASMUS+

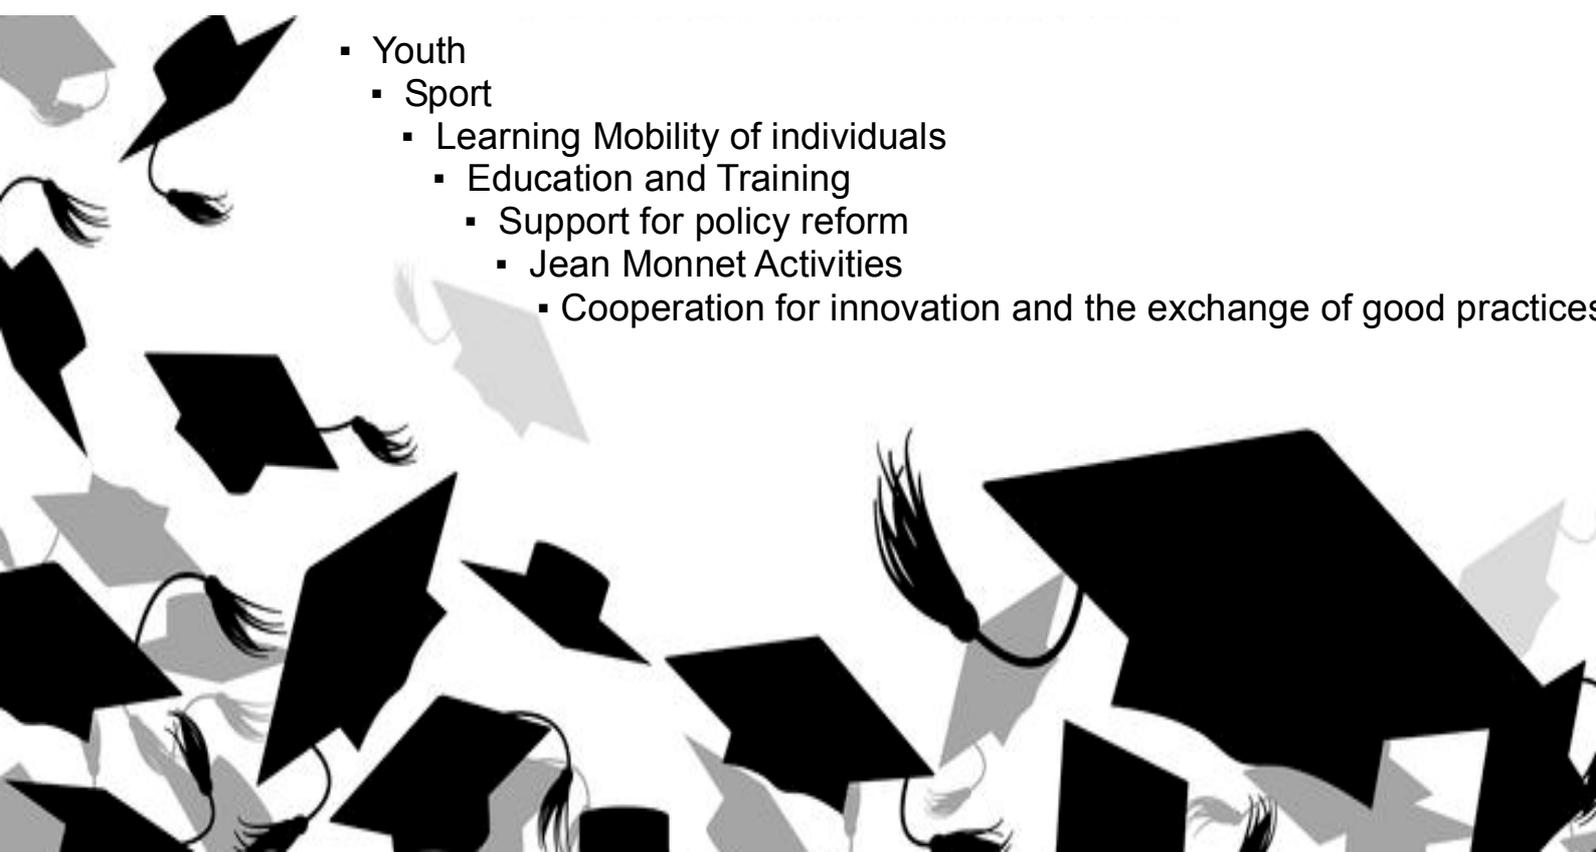

2014 - 2020 programme for Education,
Training, Youth, and Sport

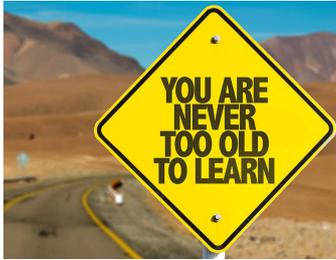

In the frame of Erasmus + Educational Provider Agency is a perfect partner able to capture, structure and **leverage capacities to motivate** public and private stakeholders to co-operate and to stimulate young participants to be part of the projects applied and approved.

EPA is a company with important professional resources to boost every project managed or assigned. **EPA** is proud to be chosen as an educational provider by reputed and among the largest international industries and public educational stakeholders.

WE ARE ACTIVE IN THE FIELDS OF:

- 
- Youth
 - Sport
 - Learning Mobility of individuals
 - Education and Training
 - Support for policy reform
 - Jean Monnet Activities
 - Cooperation for innovation and the exchange of good practices

Our **Life Long Learning Department** is providing learning programs and experiences for adults and stimulating and enlightening educational performances with “appeal” just to facilitate social inclusion in the community and to find new job. We always discover new ideas to train in a friendly environment with the use of modern social networks.

Considering that everyone can be the creator of its own destiny, we encourage adults from the various social classes to invest their capacities just to restart their formative and educational journey promoting their talents to reach their goals.

VET

VOCATIONAL EDUCATION AND TRAINING

EPA is a private education agency delivering efficient services and professional training in the **VET** systems. **EPA** is being challenged to adapt the courses following the rapid technological changing in the social and economic world. We deliver educational programs and training courses designed for traditional, alternative and innovative jobs with a wide range of proven programs in mainstream education. We can inspire and design tailored Vocational projects with the capability and the opportunity to create a worker with a tailored background.

ETP ENTREPRENEURIAL TRAINING PROGRAM

EPA promotes entrepreneurial training courses with the aim of helping entrepreneurs and ambitious young people. A task force of experts plan training programs to instill basic business know-how and develop skills and competencies for new young entrepreneurs. In addition to our training course, we assist the young entrepreneurs to create their start-up.

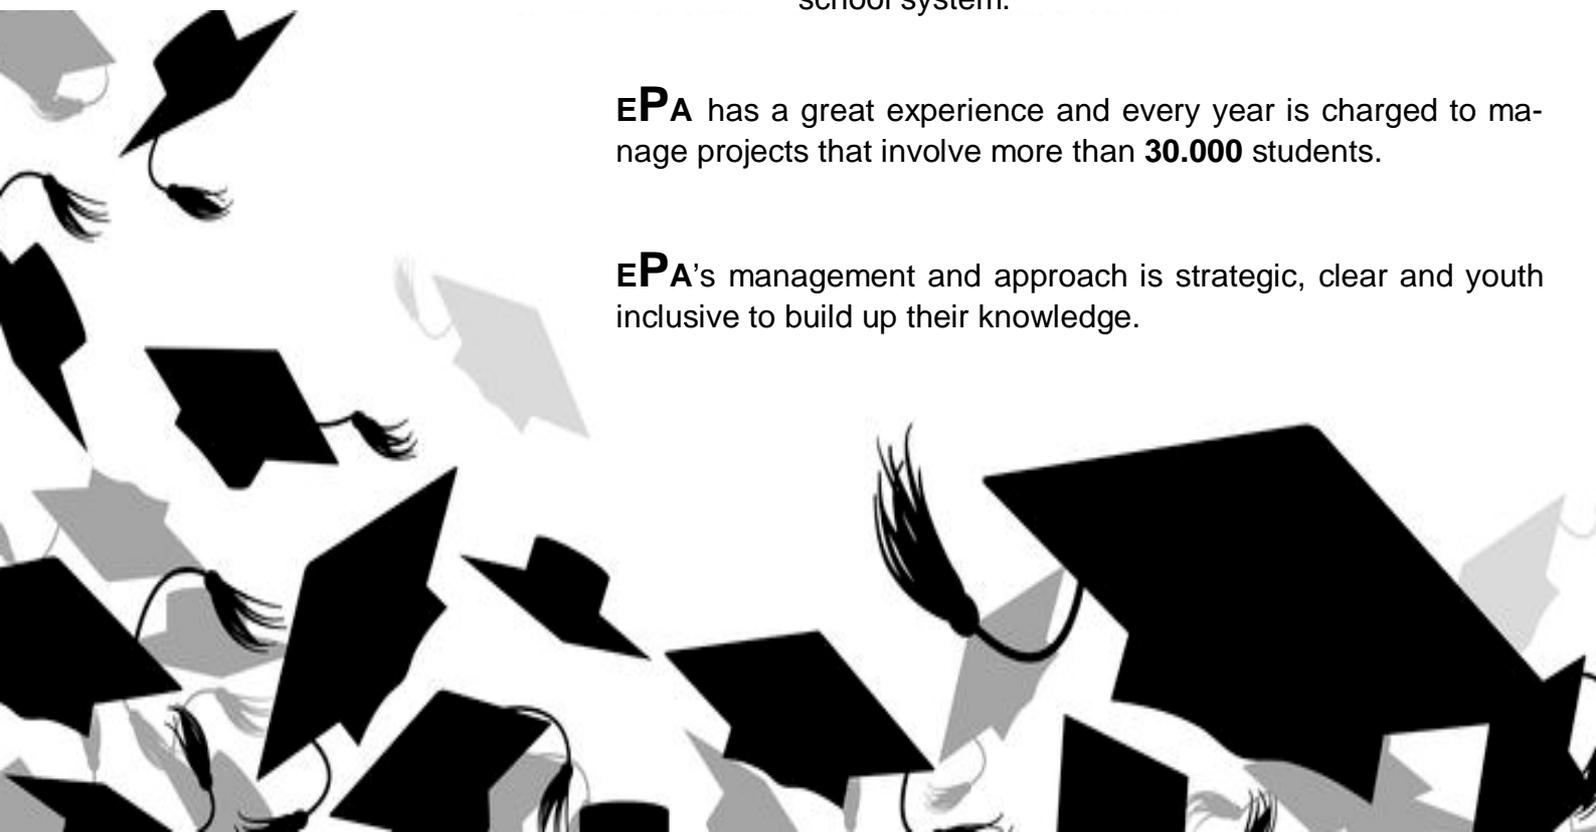

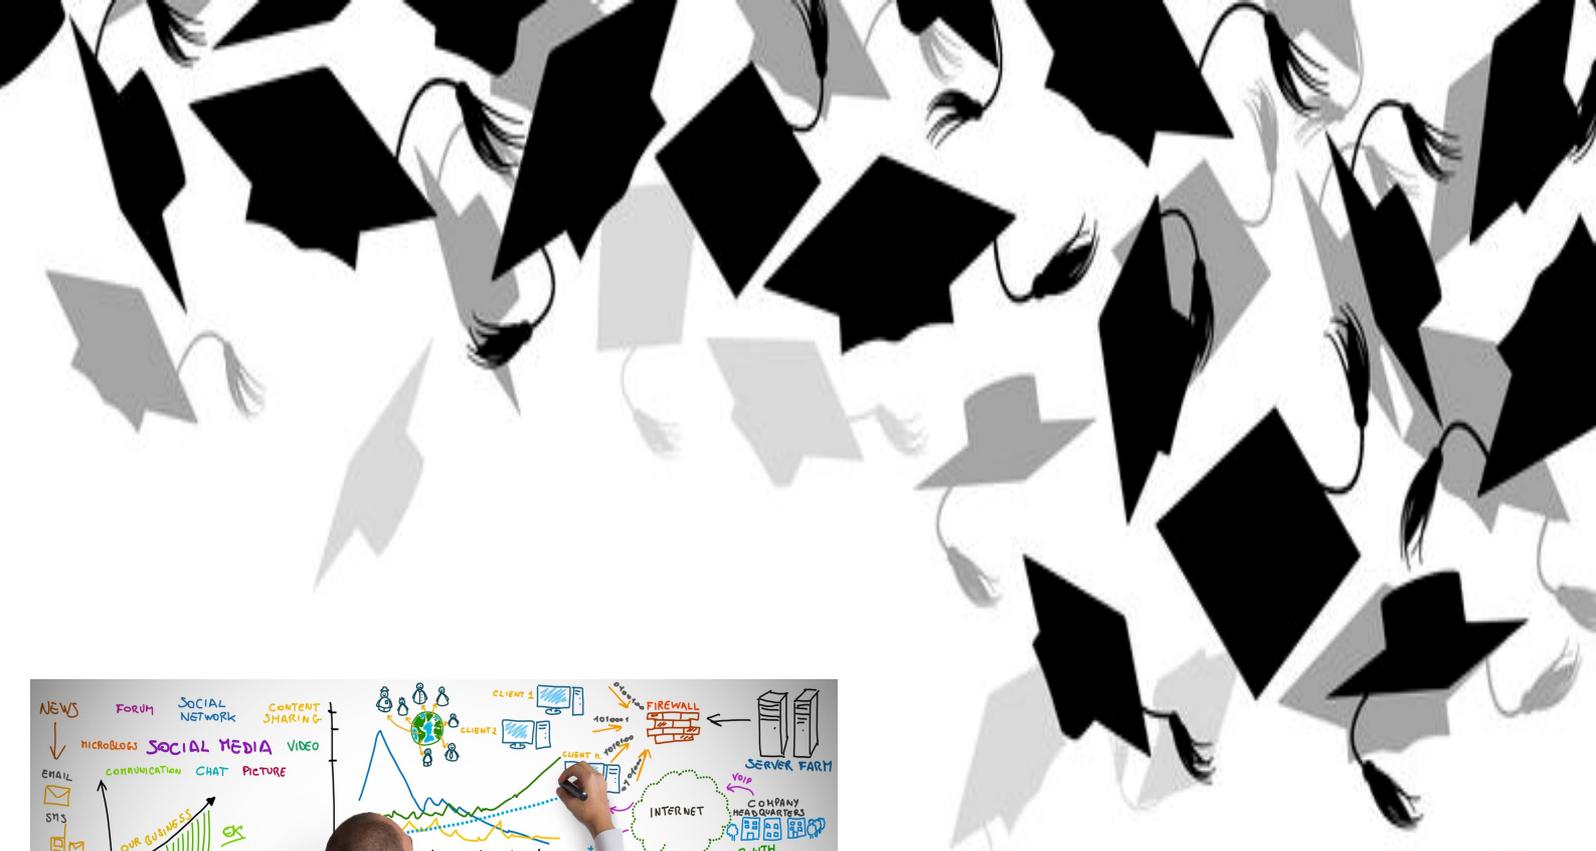

EPA provides national and international educational and training youth campaigns focused on healthy environments, nutritious food, health services and opportunities for physical activity, against tabagism, drugs and alcohol. Passion and leadership are our values in order to be an important partner for the education systems.

For these reasons, **EPA** is a unique educational agency able to connect important projects, and has good relationships with primary and secondary schools, universities and VET schools. We can support teaching and learning environments reducing early school-leaving, increasing access to education and meeting the needs of a modern school system.

EPA has a great experience and every year is charged to manage projects that involve more than **30.000** students.

EPA's management and approach is strategic, clear and youth inclusive to build up their knowledge.

EPA organises local, national and international events, congresses, meetings, round tables focused on professional learning needs. We provide consultancy and tailored trainings to industrial and service companies. We have a **mini task force of senior experts** specialised in forming training professionals and university professors interested in learning new teaching methods and in sharing knowledge to develop new motivational and teaching approaches for their students.
